

## **KJELLBERG CUTTING NOW SERVING US MARKET**

### **Company with new operation in Texas is displaying plasma cutting technology at FABTECH**

**Lewisville, TX:** Kjellberg Cutting Inc. today announced the opening of its facility in the US, based in Texas. With the ability to ship from the US warehouse while providing customer service, logistics, training and technical support this will offer a new and customer friendly way for US based cutting table manufacturers to gain easier access to these outstanding plasma cutting systems.

“We are excited to bring such a strong name in plasma cutting to the US market, to be exhibiting this September at FABTECH in Chicago and to be part of leading the way toward value added digital solutions for plasma cutting,” says Alex Stem, President at Kjellberg Cutting Inc.

Highlights of the latest developments with Kjellberg include:

- Kjellberg Cutting Inc. operation is up and running and has the capability to provide US delivery, technical support and service, training, order management and fulfillment
- A range of solutions for cutting up to 6 inches of material and a broad menu of process technologies that are easy to integrate across multiple cutting machine and CNC platforms
- Introducing a new system called Q Series which is IoT enabled and ready for Industry 4.0.
